Rbooa Al Saenaya

Lazer Cutting, Wrought Iron & Aluminium works
Structural & Non Structural Metal works

An ISO 9001:2015 Certified Company

PROFILE

Rbooa Al Sanaiya Steel & Aluminium works is an innovative fabrication company located in the green city of Al-Ain, United Arab Emirates that caters to fabrication services like iron, steel, aluminium and alloy based products for construction and manufacturing sectors.

Our services and projects include fabrication of structural & non-structural works in Wrought iron, Cast iron, Steel and Aluminium. We also fabricate doors, windows, gates, staircases, ladders, fencing, towing trolleys, vessels, pipe lines and all types of fabrication and mechanical jobs for all sectors. We specialize in Plasma / Laser cutting of Iron, Steel and Aluminium plates.

Our expertise team of employees execute iron, steel and aluminum works of apartments, villas and residential projects as per the national and international standards. Moreover, Rbooa Al Sanaiya Steel & Aluminium works is a one-stop shop for all Iron, Steel and Aluminium works.

The company's leadership comprises of highly experienced professionals in the field. Experienced engineers, supervisors, adequate skilled technicians, qualified welders and fabricators with proven track record are engaged in executing sophisticated projects. Rbooa Al Sanaiya Steel & Aluminium works is part of a conglomerate which has operations in structural and non-structural steel fabrication, General trading, Building material supply, Cement products, Truck body building parts and solutions, Hydraulic solutions, Technical contracting and Manpower supply.

Our vast experience, remarkable prompt service and guidance helps our customers to select "the right product / service for right application at competitive rate."

We take immense care in selecting our suppliers and their products in terms of quality, consistency, price and their service, which in return helps us to be on the mark of our commitment to our customers.

ECONOMICAL CNC CUTTING FACILITY

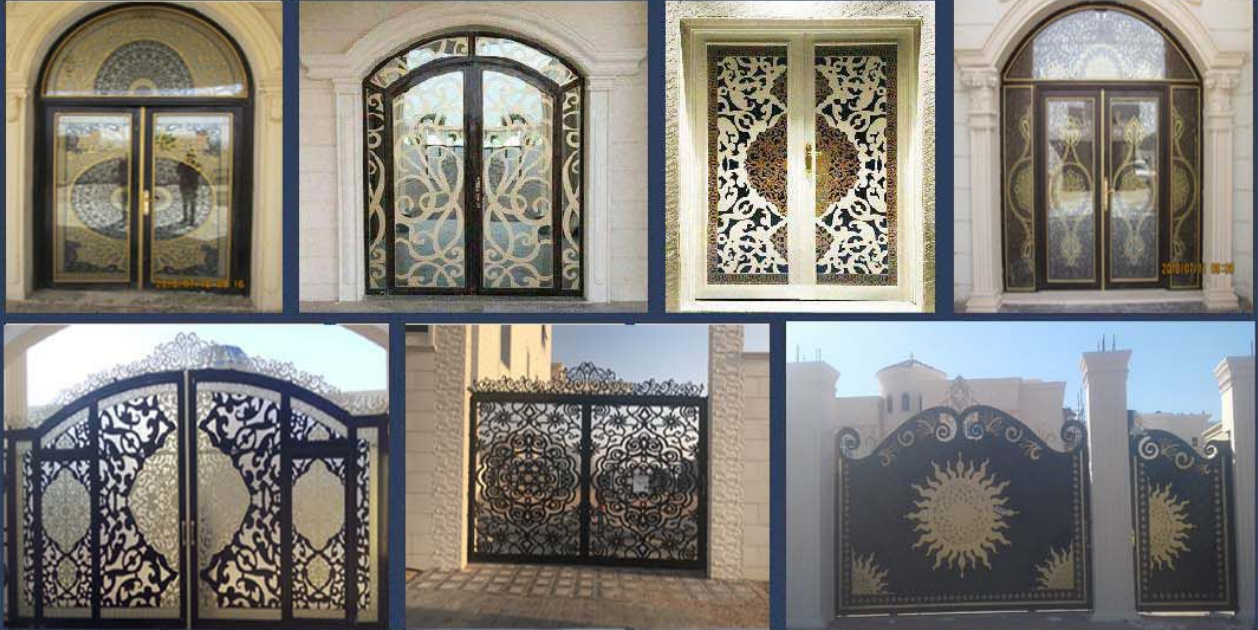

Our CNC Machine can achieve excellent sheet plate cutting performance by applying the platen mode, water cooling mode and Arc voltage sensing THC mode with cutting thickness from 0.3 mm to 22mm in Carbon steel, stainless steel, copper alloy, nickel alloy and titanium alloy.
